"LABOR OF LOVE" AWARD. This game was really ♥♥♥♥ing fun for awhile but then it broke, guess I'll just have to have even more fun replaying it. No control options is the best thing EVER! Now I don't have to mess with using a controller or even a wheel cuz I just don't have the ability to! No more mucking around with "PRETTY" games either this one is all gameplay. About the gameplay? Well, I tell you, Don't bother with any of these complicated games with gas, brake, HAND brake, views, FUN... Wow, it's just too much hassle to learn how to steer anything these days so this game gets it right it just does away with anything other than the BARE essentials! Go, stop, shoot the challenge guns and jerk violently to one side or the other, who needs anything else? The track design is just THE most amazing! Imagine a racing game you have to actually figure out where the track is! Ya, I know right? It's great it's like you get a free adventure game all included! Don't waste a single penny on this ♥♥♥♥ing travesty. Buy a good game instead.... When this game first came out, it was decent but now it is terrible. I haven't had 1 minute of gameplay as all the servers are still in version 1.5 and 1.4. if you have this game and it works, then you are lucky in this day and age.. great game, more content than Wizards Throne, but plays the same, if not slightly better. great game to play with a few beers and a few mates. wishing more people had this game so I can Multi with them. a blast from the past. you have quite a neat concept here, but the bridge power is not very good, also there are quite a few noticeable framedrops when riding the first lift, also I did not really like having to get to a power source to be able to swap powers.. In my own opinion this game isn't set up entirely well, for \$7 I don't believe it is worth buying, it seems more like a game that should be a free flashplayer deal. But if you want to make your own decision before buying it you can check out my video of my first thoughts here. <https://www.youtube.com/watch?v=kccK88RaEBs>. Sadly what could have been so much more remains to be a badly executed Total War ripoff.. played this game with my brother it was pretty awesome if you like driving around trying to kill each other and also at the same time mowing the lawn trying to keep a decent pattern and hateing life when someone reks it this is your game honestlry tho I did enjoy it

[needs controller support tho. and more people](#)

[maby things like power ups or something random events like a tornado or something be cool. This is another P2W. Well, then try to win with skill. oh wait. There is no skill needed. Only luck. Don't try it. It's based on luck.](#)

Yeeeeeeeeeeep, yep, yep, yep, yep

it's DESCENT!. the game was ok. it was short and seemed that it could of had a better ending. i almost felt like the put a lot into the game and then ran out of time and or energy so just put a ♥♥♥♥♥♥ ending on.. Best 5\$ you'll spend on VR game. Totaly worth it!. Fantastic little game for the price and very addictive. Felt a bit repetitive at first but the gameplay soon evolves as you unlock lots of new weapons and gadgets and improve your skills. Recommend it.. I've been playing this series since the 2nd game release, before this one even came to Steam. I reccommend it. If you're interested enough to read this review, I can safely say that you'll have fun with it. It's basically an indie Supreme Commander with a few of its own twists, and it's well made.

Note: I'm running it great on my Surface Pro 3, Windows 8.1 with just a touch screen and it is working like a charm so far (not that you have to on any of those counts).. Awesome little puzzle game. The final levels took some serious thinking. If you enjoy games like Portal, The Talos Principle and so on, you'll enjoy this relaxing but aggravating game with it's brain testing puzzles yet soothing soundtrack.. The stream buffers a lot for me. Other than that it's a good episode so far. I'm typing this as I'm waiting for it to buffer... still buffering...
